

REPAIR TAPE

Strong Rubberized Waterproof Tape

超強力防水修補膠帶

REPAIR TAPE is a super strong, rubberized, waterproof tape that can patch, bond, seal and repair virtually anything! It is specially formulated with a thick rubberized backing that conforms to any shape or object. This durable adhesive tape instantly seals out water, air and moisture to create a super strong, watertight barrier. Unlike other tapes available, REPAIR Tape's bond will increase with time and pressure.

Product Features

- Thick rubberized adhesive
- Conforms to any shape or object
- Seals out water, air and moisture
- Great for patching large holes, cracks, gaps, and tears
- Can be applied hot or cold, wet or dry...even underwater
- VOC-free
- Available in three (3) sizes to cover cracks, holes, and gaps of any size
- Can withstand temperatures from -70°F to 200°F and extreme weather conditions
- UV resistant
- Environmentally friendly

Recommended Uses

REPAIR TAPE® has a triple-thick adhesive allowing it to virtually weld itself to the surface, instantly stopping the toughest leaks. The most common uses for REPAIR Tape are listed below:

Common Repair Tape Applications:

- Leaky roofs and ceilings
- Damaged gutters and down spouts
- Boats, kayaks, personal watercrafts, canoes, and other outdoor equipment repairs
- Leaky PVC and plumbing pipes
- Repairs for mobile homes, RVs and campers
- Sprinkler system, pool, and spa leaks and repairs
- Patch and seal windows, doors, walls, seams, and vents
- Repair air ducts and HVAC systems
- DIY projects
- And much more!

Recommended surfaces:

- PVC
- Acrylic
- Metal
- Steel
- Tile
- Copper
- Aluminum
- Wood
- Ceramic
- Porcelain
- Glass
- Rubber
- Fiberglass
- Stucco
- Plaster
- Stone
- Cement
- Concrete
- Dry wall
- EPDM roofs

Some plastics, fabrics, vinyl and so much more!

REPAIR TAPE

Strong Rubberized Waterproof Tape

超強力防水修補膠帶

Directions

1. CUT. Leave backing on tape and cut to desired dimension. Make sure to use high quality scissors or razor blade when cutting.
2. PEEL. Remove the backing from the tape.
3. STICK. Apply tape to a clean surface and press down firmly.
4. SEAL. Using your fingers, plastic squeegee or roller, press down firmly and remove any air pockets.

HOSE LEAK REPAIR

1. Cover the leak with a small patch of Repair Tape, slightly bigger than the hole or tear in the hose.
2. Use firm pressure to get rid of all of the air bubbles.
3. Then, take a second piece of REPAIR Tape and wrap it all the way around the hose, covering the patch.

*RepairTape is a temporary, emergency repair and is not meant to be a permanent fix.

**Repair Tape may not bond to all hoses.

REPAIR TIPS:

1. For maximum adhesion on porous surfaces, using a standard blow dryer will help the adhesives bond with the surface.
2. REPAIR Tape's bond will increase with time and pressure. Continued firm pressure will help increase adhesion.
3. Once fully bonded, REPAIR Tape cannot be repositioned.
4. REPAIR Tape adhesives may resist bonding to some plasticized or waterproof materials, siliconized, greasy, oily, dirty, or porous surfaces.
5. Certain fabrics such as canvas, nylon, polyester, synthetics, cotton and some other materials may need up to 24 hours to reach maximum hold
