

**Automatic airvent PN 10 with automatic shut off
DN 15 1/2" M, brass**

Description

HL air vent eliminates air which is generated during heating up periods of a heating system.

The air vents prevent

- Corrosion
- airlocks in radiators and resulting flow noises
- dry running of the pump

The air vents can be cleaned and replaced under working condition and without pressure discharge via automatic shut-off device.

The air vents should be installed vertically at the highest point of the system. Suitable installation points are risers, distributors, air separators or other points prone to airlocks.

HL-Automatic airvent PN 10 with automatic shut off
DN 15 1/2" M, brass

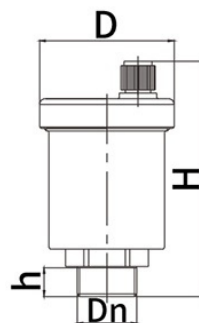

Material: Brass

Size: DN 15

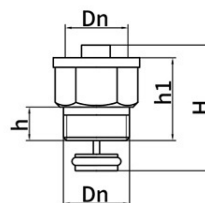

max. pressure: PN 10

max. temperature: 110 °C

Item no.: OAV
